Faisol Dwiki Amrizal

Fullstack Developer
20 Pangeran Diponegoro Street, Maguwo, Depok, Sleman, Yogyakarta, Indonesia
faisaldwiki69@gmail.com | +62 812 4910 1538

Experienced backend developer with a demonstrated history in e-commerce and website development. Skilled in database management, API integration, and coding with a focus on scalable and secure applications.

Work Experience

Fullstack Developer Jan. 2025 – Present

PT Coding Colelctif Indonesia

- Fullstack development for internal and client-facing projects using modern web technologies.
- Designed and implemented scalable project structures, including architecture planning, versioning, and deployment pipelines.
- Built and managed WebSocket-based services integrated with banking APIs for real-time data communication and transaction tracking.

Website Developer Apr. 2021 – Nov. 2025

DV9 International PTE LTD (Singapore)

- Rebuilt outdated client systems and resolved front-end and back-end bugs in legacy codebases.
- Developed multiple e-commerce platforms using Laravel and Bootstrap, integrating secure payments with PayPal, Stripe, and RazorPay.
- Collaborated with cross-functional teams across borders to deliver web projects on time, adhering to client specifications and timelines.

Backend Developer Apr. 2021 – Oct. 2024

PT. Naisha Inspirasi Muslimah

- Designed and developed scalable backend systems supporting e-commerce operations including order processing, inventory control, and user management.
- Integrated third-party APIs (Shopee, Tokopedia, etc.) to synchronize product listings, order updates, and payment status.
- Improved data security by implementing encryption and authentication for sensitive user and transaction data.
- Optimized SQL queries and implemented caching (Redis) to enhance system performance by reducing response time by up to 40%.

Freelance Web Developer Sept. 2019 – Present

Self-employed

- Delivered tailored web applications for local clients including online invitations, personal profiles, and business landing pages.
- Handled end-to-end project development from client briefing, UI/UX prototyping, coding, testing, deployment, and maintenance.
- Maintained long-term client relationships by providing continuous support and updates for deployed systems.

Education

Bachelor's in Informatics Engineering Aug. 2016 – Nov. 2020

PGRI Madiun University

- Studied network security, programming languages (Java, C++, C#, PHP, Javascript), and web development fundamentals

Skills

Technical: JavaScript, Node.js, SQL, Git, HTML, CSS, Laravel, Golang
